

I feel this is an Infringement on my fair use rights. If I was to copy a show so that I may have it for viewing later in my own home then I should be allowed to do this. The airwaves were given to networks for free. How is it that use of the transmission for personal use and backup now will become illegal. We have been allowed to tape and make copies of transmission for many years now. What has changed? A clearer picture or sound. That should not be the reason for the average user to be punished
